Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# Teste" >> README.md  
git init  
git add README.md git add .  
git commit -m "first commit"  
git branch -M main  
git remote add origin https://github.com/Ivaneudo/Teste.git  
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/Ivaneudo/Teste.git  
git branch -M main  
git push -u origin main
```

ProTip! Use the URL for this page when adding GitHub as a remote.
