

Repositório no GitHub

The screenshot shows the GitHub Dashboard interface. On the left sidebar, under 'Top repositories', there is a 'New' button (a green square with a white computer icon and the word 'New') and a search bar labeled 'Find a repository...'. A red arrow points from this 'New' button towards the main content area. The main content area has a header with 'Ask Copilot' and a search bar. Below this, there are buttons for 'JS email validation guide', 'Pull requests in microsoft/vscode', and 'Rails authentication endpoint'. The 'Home' section features a 'Learn with a tutorial project' link and several tutorial cards: 'Introduction to GitHub', 'GitHub Pages', 'Code with Copilot', and 'Hello GitHub Actions'. At the bottom, there is a 'Start a new repository for Ivaneudo' section with a form to create a new repository, including fields for 'Repository name', 'Public/Private' selection, and a 'Create a new repository' button. On the right, there are sections for 'Latest changes' and 'Explore repositories'.

Repositories that need your help

gradle / gradle
Adaptable, fast automation for all

joaomatossilva / DateTimeExtensions
This project is a merge of several common DateTime operations on the form of extensions to System.DateTime, including natural date difference text (precise and human rounded), holidays and working days calculations on several culture locales.

up-for-grabs / up-for-grabs.net
This is a list of projects which have curated tasks specifically for new contributors. These issues are a great way to get started with a project, or to help share the load of working on open source projects. Jump in!
