

# Verificação em duas etapas

The screenshot displays the GitHub Developer Settings interface. In the top navigation bar, the path 'Settings / Developer Settings' is visible. The left sidebar contains a list of settings categories: 'GitHub Apps', 'OAuth Apps', 'Personal access tokens' (highlighted with a blue bar and a red arrow pointing to it), 'Fine-grained tokens', and 'Tokens (classic)'. The main content area is titled 'Personal access tokens (classic)' and features a key icon. It contains the message 'No personal access token created' and a subtext: 'Need an API token for scripts or testing? Generate a personal access token for quick access to the GitHub API.' Below this is a 'Generate new token' button with a dropdown arrow, and a link to 'GitHub API'. At the bottom, a text box explains that personal access tokens (classic) function like ordinary OAuth access tokens and can be used instead of a password for Git over HTTPS, or to authenticate to the API over Basic Authentication. The footer includes the GitHub logo, copyright information for 2025, and links to Terms, Privacy, Security, Status, Docs, Contact, Manage cookies, and Do not share my personal information.
